## Abstract

Offspring of the [Deep Review](#). We cite the Deep Review like [\[1\]](#) or [\[1\]](#). The source repository is [\[2\]](#).

## Equations

Numbered equations can be included by using `$$` delimiters with embedded LaTeX math. Equations can be labeled with tags like this `{#eq:label}` and referenced in text using `@eq:label`.

$$y = mx + b \tag{1}$$

Equation [1](#) is the equation for a line in slope-intercept form.

## Figures

Numbered figures can be included by using the format `![Caption text](URL){#fig:label}`. The figures can be referenced in the text by using `@fig:label`.

Figure [1](#) shows the interest for "Sci-Hub" and "LigGen" over time.

Figure 1: Google Trends Search interest for Sci-Hub and LibGen.

## Tables

Numbered tables can be included by using Markdown syntax to create the table and then adding a tag after the caption like this {#tbl:label}. The tables can be referenced in the text by using @tbl:label.

Table [1](#) shows the relative search interest of the terms "Sci-Hub" and "LibGen" the week of June 25, 2017.

Table 1: Google Trends Search interest for Sci-Hub and LibGen.

<b>week</b>	<b>search_term</b>	<b>interest</b>
2017-06-25	LibGen	47
2017-06-25	Sci-Hub	56
